

# Driving Productivity in Government

Enabling leaders and workers to be productive anywhere, any time

Vuk Vukasinovic, SSP Business Productivity  
27.2.2015.

# Definition of Productivity:

- A measure of the efficiency of a person, machine, factory, system, etc., in converting inputs into useful outputs – **Business dictionary**
- *Productivity* is an average measure of the efficiency of production. It can be expressed as the ratio of output to inputs used in the production process, i.e. output per unit of input. When all outputs and inputs are included in the *productivity* measure it is called total *productivity*. – **Wikipedia**
- Use the noun **productivity** to describe **how much you can get done**. Your boss at work probably keeps track of your productivity — *meaning he's checking to see how much work you do and how well you do it* – **Vocabulary.com**

# Growing expectations for Governments !!!

Citizens and businesses expect improved services and deeper engagement

Workers expect easier tools, applications, & devices that work anytime, anywhere

Leaders expect greater insight, accountability, and compliance

There is NO universal solution!!!

Microsoft answer to productivity challenge's:

# Productivity Platform – Office 365 !

Modern platform

Enterprise Social Platform

# Connecting public services and partners

# Yammer – What is it?

Institutions and companies usually are systematized like :

*Formal organizations – can be identified thru Org Chart*

*Un-Formal organization – creates thru interaction between employment on daily basics.*
